Manufacturer's declaration according to the REACH Regulation (EC) No. 1907/2006

Dear Sir or Madam,

With reference to your inquiry based on the compliance with the REACH Regulation (EC) No. 1907/2006, we can inform you about the following:

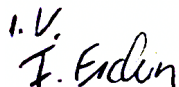

The Wiha Werkzeuge GmbH is producing hand tools and is dealing with them worldwide. According to the EU Chemicals Regulation, which became effective on the 01st of June 2007, the Wiha Werkzeuge GmbH is classified as "**Downstream User**". Consequently we are liable to supply sufficient information about the ingredients of goods as laid down in Article 33, REACH Regulation. A downstream user is defined as any natural or legal person within the European Union, **who uses a substance**, either on its own or in a preparation, in the course of his industrial or professional activities. The Wiha Werkzeuge GmbH takes the reporting requirement seriously within the supply chain, particularly with regard to any substances of very high concern (**REACH 241 SVHC**).

Thus, our suppliers confirmed that they meet the requirements, which result from the REACH Regulation. They will inform us unrequested and immediately if any of the supplied goods will contain substances with a weight proportion $\geq 0.1\%$, which are registered on the candidates list by the European Chemicals Agency (ECHA). If this may be the case, we will instantly pass this information on to you as our customer.

Based on our supplier's statement, we hereby acknowledge that all products manufactured and delivered by the Wiha Werkzeuge GmbH contain only such substances which comply with the REACH-Regulation and the candidates list as of the 27th of June 2024.

You can review resp. download the latest and constantly updated candidates list under the following hyperlink: <https://echa.europa.eu/candidate-list-table>.

With Best Regards

i.V. Florian Eichin
Manager TEC-Center / IMB
